

**RPOWER's Real-Time DASHBOARD**

**RPOWER Dashboard**

A real-time, secure web page viewable from any web-enabled device keeps management in touch with restaurant operations while away from the establishment. Data points include real-time site and server sales, discounts, voids, check and guest averages, and more.

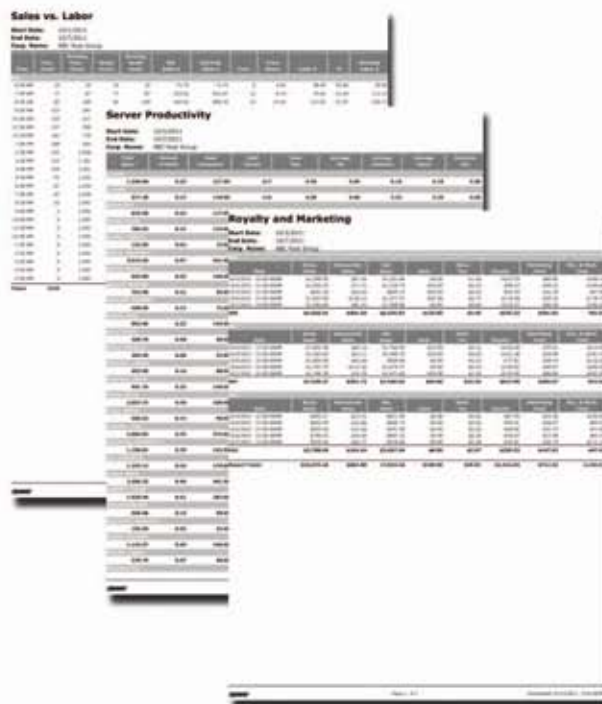

**Multi-Function Email**

Use **RPOWER's** internal Email engine to auto-send Daily Sales Reports to ownership, Pay Period Reports to your Payroll provider, or on the fly Emailing of **RPOWER** Reports to key personnel.

**RPOWER SQL Reporting Engine**

**RPOWER's** SQL Reporting Engine makes it possible for single and multi-location groups to collect and securely warehouse store-level sales, labor, customer, and inventory data to a centralized SQL Server. Utilize **RPOWER's** own secure Web Reports Package to host and view over 70 various reports including multi-store consolidated Product Mix, Hourly Sales, Overtime and Discount monitoring.

For locations wishing to merge or host their own data, **RPOWER's** SQL Engine can provide a customizable solution ensuring daily collection and delivery of store data in the format that meets your technology needs.

**RPOWER** is also compatible with the following above-store management solutions:
