

RPOWER's time clock capabilities keep management in complete control

Employee Time Clock Tracking

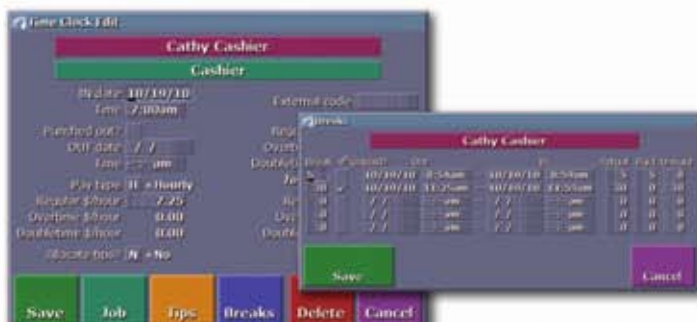

RPOWER keeps you in control of your employees with a fully integrated Time Clock Module. The built-in tip tracking and labor reporting give you the tools you need to manage your labor. Easily calculate overtime and run time clock reports for payroll analysis. Its extensive features include multiple jobs and pay rates for employees, numerous security level settings, simple time clock and tip editing, pre-set tip pooling and allocation, and real-time analysis to keep management ahead of the curve.

The **RPOWER** Time Clock Module can drastically reduce valuable management time and produce the reporting every restaurateur needs to minimize labor costs. To save even more time, use one of the **RPOWER** External Payroll interfaces to transmit all needed payroll information directly to your payroll services provider.

Restrict your employee clock-in/out times and share employee sales data with one of **RPOWER's** integrated Labor Scheduling partners. Each provide comprehensive tools for labor forecasting, schedule analysis, productivity reporting and more.

Increase your POS system security and Time Clock record keeping with Integrated Fingerprint Readers. **RPOWER** has the ability to enforce fingerprint use on management required operations, time-clock entries or all POS operations.

RPOWER Employee Breaks

RPOWER tracks up to five break times per employee per day. Each definable break is configured as Paid or UnPaid, with options for Early/Late Return policies based on manager approval. **RPOWER** break functionality keeps you in compliance with your state labor regulations.
