

Fine Dining and Table Service

RPOWER has developed features catered specifically towards the Table Service environment. Intuitive operations for splitting checks, menu coursing, and fire/held ordering reduce time at the POS terminal, keeping service staff attention on the customer. **RPOWER** also includes built-in features to increase staff awareness and simplify in-house communication with employee messaging, count down/86 notification, and menu item/specials-description capabilities. Smart ordering software with forced and unforced modifier selections complete the order process while minimizing touches. Integrated high-speed credit card processing with definable capabilities for off-line processing, tip percentages, and receipt validation printing provide flexible controls for payment processing and advanced credit card security. **RPOWER's** Table Service software provides the unmatched stability and dependability our customers demand, keeping your team in control.

Mobile Ordering

Speed up your order time and table turns with **RPOWER** Mobile Workstations. Capitalize on complete **RPOWER** functionality including secure table-side credit card payments and receipt printing.

Graphical Tables

RPOWER Graphical Table layout provides a comprehensive look at the current status of tables in your establishment. Twelve different color codes denote table status from initial seating to a dirty status enabling your staff to operate with increased efficiency. On-screen quick action buttons for printing guest checks, paying/closing checks, firing-held orders, and duplicate round ordering. Multiple room and staff views keep the entire staff in tune with your guests.
