QuickBooks

Unlike any other POS System, the **RPOWER** **QuickBooks** Interface operates with no human intervention. When **RPOWER** closes the day, it sends accounting data to a location accessible to the computer with **QuickBooks** installed and posts your daily sales information directly into your **QuickBooks** company database. **RPOWER** interfaces with both **QuickBooks** Desktop and **QuickBooks** Online Software versions.

Do-It-Yourself Payroll

Upon completion of the Pay Period Time Clock report, **RPOWER** will automatically send time clock and tip records to the **QuickBooks** Do-It-Yourself Payroll. **RPOWER** is unique in its ability to export tip data into **QuickBooks** for use in box 7 of the employee's W2. **RPOWER** also sends new and updated employee demographics to **QuickBooks** daily.

Customer Billing

RPOWER maintains the master list of **QuickBooks** charge accounts and their members. New and updated accounts are imported into the **QuickBooks** Customer List daily. Each member charge posts as a separate **QuickBooks** invoice that is tied back to the **RPOWER** guest check. Current balance information is sent back to **RPOWER** for viewing at the restaurant level. Customer account payments can be made through **QuickBooks** or your **RPOWER** System.

Multi-Location Posting

For multi-site chains utilizing **QuickBooks**, **RPOWER** can import store data to unique **QuickBooks** company files for each location or it can post each store's data to a singular consolidated company file. Talk with your local **RPOWER** Dealership about the time-saving opportunities **RPOWER** can provide your company with today.

Accounting Software Interfacing

A variety of software accounting packages are available to businesses. **RPOWER** has created custom extracts with several: **ACCPAC**, **Microsoft Great Plains**, **MAS 90** and **QuickBooks**. Other accounting integrations are also available.

Hotel/PMS Interfaces

RPOWER provides an interface for establishments located within hotels, resorts and clubs for posting billing to rooms and folio accounts. The **RPOWER** Hotel/PMS Interface is available for several Property Management systems including: Micros/Fidelio, Encore, Lodging Link, System 21, AutoClerk and others.

External Product Tracking

RPOWER interfaces to a variety of product tracking software systems including: ChefTec, Scannabar, FreePour, Food Trak and many more. Automatically extract and post all POS sales information into specific file formats for any of the integrated systems.
